DON'T DELAY

TAKE ACTION NOW

Our Incident Response TEAM can help your business to **plan** and have **peace of mind**. Once our team receives a call identifying a presumptive or active COVID-19 outbreak at a facility, our expert industrial cleaning technicians will set up a plan of action.

1. Dispatch an Incident Response TEAM. We gather, and will confirm the following information:
 - Key contact people.
 - Parking availability.
 - Trucks/equipment required.
 - Area(s) of the facility affected and/or contaminated.
 - Area contact tracing of the infected employee(s).
 - Site-specific safety and security requirements.

TEAM will tailor a plan of action, then communicate to your teams so that they are prepared once our team arrives on-site.

2. When an outbreak happens, the Incident Response **TEAM will arrive at your site at a pre-planned rally point**. We will review the plan and the Job Safety & Risk Assessment (JSRA) for the affected area(s) with you including any lockdown zones, known hazards, and restrictions to mitigate.
3. Execution details including the donning of appropriate Level PPE (A, B,C, D) will occur prior to the Incident Response TEAM's entry to the **hot zone**.
4. Utilizing only **Disinfectants** approved for the safe and effective removal of COVID-19 viral contaminants, the Incident Response TEAM will enact next-level cleaning.

5. In addition to using **contactless** spray technology, the Incident Response TEAM will **hand wipe** to remove residue on areas as per customer requests such as mirrors, glass, and additional high-touch surface doorknobs and entry areas (confined space).
6. **Visual signage and aids with the TEAM Group brand** will be posted at agreed upon points, also noting the area(s) that have been fully cleared and decontaminated.
7. The Incident Response TEAM will then review the level of disinfecting with the customer, confirming that all areas are completed.
8. Dispose of materials onsite or offsite in approved and legally designated sites where rags and spent PPE will be securely destroyed.
